

Ikonix Application Consulting services have achieved significant success in the USA, garnering high recommendations from our satisfied customers. We leverage valuable on-site experience gathered and developed over time to assist your team in overcoming challenges in electrical safety testing and mitigating risks. Furthermore, this service can also serve as a standardized training course, ensuring that new employees possess a consistent level of expertise in electrical safety and are familiar with the best practices in product testing and workstation safety. To meet the different needs of our customers, we offer **digital packages** and **1-day on-site training packages** to enhance the team's professional knowledge, work efficiency, and safety.

Operator Education

Employ best practices to comply with agency required regulations and train operators on proper testing protocols.

Safe Workstation

Ensure work areas are safe to avoid fines, litigation, and most importantly, prevent injury or fatality.

System Validation

Validate your test system to ensure that you can perform your required electrical safety tests safely and effectively.

	Digital Packages	On-site Training Package
	Designed to provide your team with the convenience of an E-Learning platform, enhancing their essential knowledge and skills in electrical safety.	Designed to deliver in-depth one-day training courses tailored to meet your specific training objectives and needs.
