

Electrical Safety Compliance Simplified.®

Hipot • Insulation Resistance • Ground Bond • Multi-Function Electrical Safety

We've been providing Customers with the features they have needed for over 60 years. We aim to simplify the Electrical Safety Industry for our Customers by applying this philosophy to everything we do.

All testers come with the accessories you need to run a test right out of the box.

CUSTOMER HAPPINESS PROMISE

We aim to provide an amazing experience and quality testers that last a long time. If you're not satisfied with your tester, return it within 45 days for a full refund. Calibrate annually with us, or one of our authorized partners, and we'll extend your warranty an additional year for the service life of your tester, and at least five years after discontinuation. If it breaks during that time, we promise to fix it for free (unless abuse or excessive damage is present). When your tester reaches the end of its service life, we'll responsibly recycle it and give you a discount on a replacement.

*Annual calibration and inspection must be made in each successive year starting one year after the original purchase date in order to remain eligible for extended warranty coverage beyond the standard warranty period (five years).

5 YEAR WARRANTY

Your new tester is warranted to be free from defects in workmanship and material for a period of (5) years from date of shipment.

**5 year warranty is valid on any model purchased in 2021 or after.

ONGOING SUPPORT

We work to provide the best service and support in the industry. With decades of industry experience we are the pros you can trust to help you be compliant to NRTL standards. We'll work closely with you to help you achieve your goals. We've built a worldwide network of knowledgeable partners, so you're covered no matter where you are.

ACCESSORIES

The **440 Series** provides advanced 4-in-1 test capability in a convenient one-box solution. This new series performs AC Hipot (448 - 500 VA), DC Hipot, Insulation Resistance and 40A AC Ground Bond tests while taking up minimal production line space. The **440 Series** is simple and easy-to-use; reducing setup time and increasing production line throughput for your application. With multiple memories and an optional USB port for remote BUS communication so you can quickly perform tests on a variety of DUTs from the front panel or with a PC.

The **290 Series** is our most popular line of Hipot testers. These testers are designed to simplify every aspect of safety testing for operators of all comfort levels. Our **290 Series** includes the most intuitive user interface in the industry and won't take up too much space on the production line. With multiple memories and an optional USB interface, you can quickly perform tests on a variety of DUTs from the front panel or with a PC. Choose from 5 different models to satisfy your testing requirements.

ICONOGRAPHY

AC Hipot

The AC Hipot test is used to stress the insulation of a DUT with AC high voltage.

500 VA

Output up to 100 mA of current during an AC Hipot test.

USB

Connect your tester to a PC for automated applications with optional USB control.

DC Hipot

The DC Hipot test is used to stress the insulation of a DUT with DC high voltage.

Test Setup Memories

Quickly setup, edit and recall test settings for different types of DUTs with multiple user-defined memory locations.

PLC Remote

Maximize operator safety by connecting an enclosure, warning lights, or safety probes to your tester.

Ground Bond

The Ground Bond test is used to verify the integrity of a DUTs earth ground conductor.

Frequency Selection

Get your products ready for the global market by testing at 50 or 60 Hz.

On the Go Portability

Denotes a tester designed for optimal portability. Perfect for use in the field.

Ground Continuity Check

The Ground Continuity test is used to verify the presence of the DUTs earth ground conductor.

Ramp

Prevents false failures by slowly ramping up the output voltage over time – perfect for sensitive or highly capacitive DUTs.

Low Current Sense

Prevents false Hipot passes with confidence by ensuring your test leads are connected correctly.

Insulation Resistance

The Insulation Resistance test is used to determine the total resistance of a DUTs insulation.

Dwell

Eliminates the need to make adjustments during testing by consistently applying the correct voltage for the correct amount of time.

Safety Agency Listed

This tester is NRTL listed and was subjected to the same rigorous tests it must perform.

* This standard requires the use of a 500VA Hipot Tester

SAFE WORKSTATION

One of the best ways to prevent injury is to ensure that your test station is set up safely and securely. Test stations can be setup with or without direct protection depending on your requirements. Direct protection means that the operator cannot physically come into contact with an energized DUT while a test is running. This safe workstation diagram uses a Hipot tester as an example to illustrate how our protective equipment can be used to keep operators safe.

A

DUT Safety Enclosure

This is wired to the Hipot tester's Remote Safety Interlock. This protects you from touching the DUT while a test is in progress. If the enclosure door is opened, the tester's high voltage is immediately disabled.

E

Signal Tower Light 24V

Gives an indication as to the status of the testing area.

H

Non-Conductive Work Bench

Only use a work bench made of non-conductive material such as plastic or wood. This ensures no stray leakage current could flow through you during a test.

B

Hipot Tester

Tester used to test the DUT.

F

Emergency Stop Button

Located on the perimeter of the test area. In the event of an emergency, someone outside the test area can hit the E-Stop button to immediately cut off power to the entire test station.

I

Dual Palm Remote Switches

Two hand operation switches force the operator to place a hand on each switch and hold them throughout the test. The palm switches should be placed at least 21.6" (550mm) apart to prevent the operator from one hand activation of both switches.

C

Test Operator

G

Warning Sign

Mark the testing area with a clearly posted sign that reads: DANGER - HIGH VOLTAGE TEST AREA. AUTHORIZED PERSONNEL ONLY.

J

NEC (National Electric Code) & NFPA (National Fire Protection Agency)

Stipulate that any unqualified workers shall not come within 10' of an EXPOSED energized circuit.

D

Insulation Mat

This isolates you from ground which provides an additional means of protection when operating high voltage equipment.

PPE ACCESSORIES

IMPROVE WORKSTATION SAFETY WITH PPE

Our Personal Protective Equipment improves workstation safety, warns unqualified operators of a dangerous testing area, and safeguards operators from electric shock. OSHA 1910 Subpart S requires, by law, that employers provide their employees with working conditions free of known hazards. We'll help you provide your employees with all necessary PPE.

CLASS 3 INSULATION MAT 40396

This class 3 electrical insulation mat is an ideal means for adding a level of operator safety. The mat isolates the operator from ground while testing, which greatly mitigates the shock hazard.

Thickness: 3/8" (9.53 mm) **Dimensions:** 3' x 3' (91.44 x 91.44 cm)

HIGH VOLTAGE WARNING SIGN 39538

This "DANGER: HIGH VOLTAGE TEST AREA" sign is ideal for warning unauthorized operators to stay away from the test area. This sign should be clearly visible and mounted outside of the electrical testing area.

SIGNAL TOWER LIGHT 24V 40417

Our Signal tower light gives operators a visual indication of the status of the testing area. A green light indicates the Hipot tester is not outputting high voltage and the test area is safe. A red light indicates that the Hipot tester is active and to stay clear of the test area.

Compatible Models: 290 Series, 260 Series, and 440 Series

DUT ENCLOSURE 39067

Our DUT Enclosures are designed to protect the operator from electric shock during testing. Interface an enclosure with our Remote Safety Interlock feature to automatically disable the instrument's output when the enclosure door is opened.

Outside dimensions (W x D x H): 24" x 19" x 11.5" (610 x 483 x 293 mm)

Inside dimensions (W x D x H): 20" x 16" x 10" (508 x 407 x 254 mm) 3/4" Walls, 3/4" Flame Retardant Foam 1/4" Plexiglass cover

EMERGENCY STOP SWITCH ESTOP

The E-Stop trigger will immediately stop the flow of electric current to your SCI tester when pressed, preventing operator injury or damage to a device under test.

Compatible Models: 290 Series, 260 Series, and 440 Series

REMOTE TRIGGER FOOT SWITCH 35822

Allows for remote operation of electrical safety tests while a safe distance is maintained between the operator and test instrument.

Compatible Models: All testers

DUAL PALM REMOTE SWITCHES DPR-01

Using two-hand operation switches ensures operator safety because it forces you to place a hand on each switch and hold throughout the test. This prevents you from accidentally touching a DUT while the test is running. The palm switches should be placed at least 21.6" (550mm) apart to prevent one-hand activation of both switches.

Compatible Models: 290 Series and 440 Series

PPE ACCESSORIES

REMOTE TEST BOX (RTB)

The RTB is a Remote Test and Reset Control Box. It comes in two different configurations: RTB-01 and RTB-02. Both models utilize the connection of Remote Input/Output on the back of all compatible SCI testers and can be used to initiate and reset a test. The RTB-02 has an additional feature (LEDs) which allow the operator to monitor the PASS, FAIL and PROCESSING signals.

RTB-01 Compatible Models: 260 Series, 290 Series, 440 Series, 1300 Series, 2205, 2503, 2510, 2550, 4320, 4520, 6330

RTB-02 Compatible Models: 290 Series, 260 Series, 440 Series, 2525, 4320, 4520, 6330

HIGH VOLTAGE RETRACTABLE PROBE 6FT (1.8M)

38081

The simple-to-use high voltage retractable probe gives operators the ability to press to activate the retractable probe tip.

Compatible Models: All Hipots

RETURN RETRACTABLE PROBE 6FT (1.8M)

38082

Our return retractable probe allows for safe contact to ground points of a DUT. The trigger style is ergonomically comfortable for daily use.

Compatible Models: 290 Series, 2500 Series, 1300 Series

DUAL ACTION TRIGGER TEST PROBE 10 FT. (3m)

38814

This high voltage test gun has a dual action test trigger that controls the retractable probe tip and activates the high voltage output of the tester. The unique ergonomic shape makes this probe easy and comfortable to use.

Compatible Models: 1340, 2500 Series, 290 Series, 4320, 4520

40 AMP HIGH CURRENT PROBE W/ LUG 10 FT. (3m)

38539

This fixed tip probe allows for easy contact with the grounding points of the DUT. The probe has two separate test buttons making it comfortable to use in various positions. The test switch can be used to activate high current after making good contact with the test point.

Compatible Models: 4000 Series, 6000 Series 264, 2630

TESTER VERIFICATION

Nationally Recognized Testing Laboratories (NRTLs) require minimums for in-service checks of electrical safety testers. In-service checks are designed to verify the measurement accuracy of the test equipment. These verification checks must accurately detect a pass and failure condition to ensure electrical safety testers are functioning properly. NRTLs require verification testing to be performed daily.

TEST VERIFICATION BOX

Our test verification box solutions are a go / no-go daily test verification designed to ensure that the failure detectors of an SCL electrical safety tester are functioning properly. These boxes were designed to verify AC and DC Hipot test functionality (the TVB-2 also has Ground Bond test functionality), making it the ideal solution for manufacturers who are required to conduct daily verifications on their test equipment.

TVB-1 Compatible Models: All Testers

TVB-2 Compatible Models: All Testers

PASS/FAIL VERIFICATION

120 kΩ Resistor

P/N: 35445

Use the 120 kΩ resistor for Hipot failure verification. It can also be used to establish a Hipot trip current/failure point.

Compatible Models: All Testers

FAIL VERIFICATION

ADAPTER BOX

An adapter box allows for safe and easy testing of line cord-terminated products. Simply connect the adapter box to the tester and then plug the DUT into the adapter box. Adapter boxes are available for most test instruments in multiple country configurations.

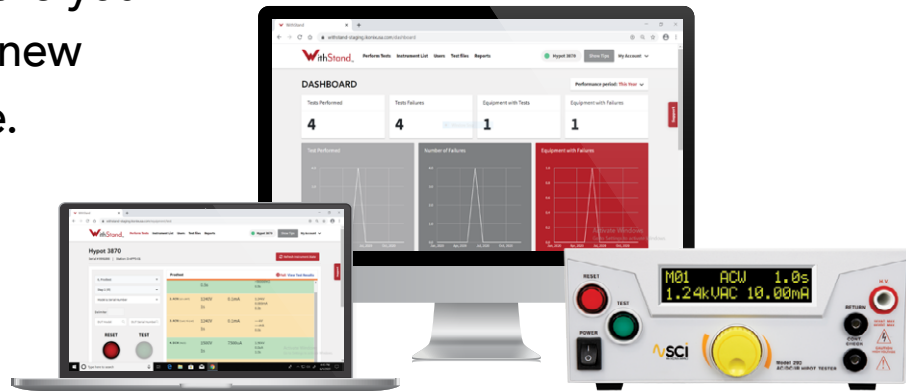

Part Number	Name	Compatible With
36544	Universal US - 10FT	290 Series, 2500 Series, 1340
36541	Universal US - HV, HC - 10FT	4000 Series, 2630, 264
40400	Universal US - HV, HC 40Amp - 10FT	440 Series

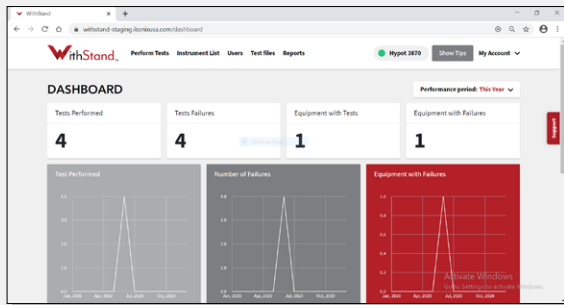

Record, track and store your data with our brand new software as a service.

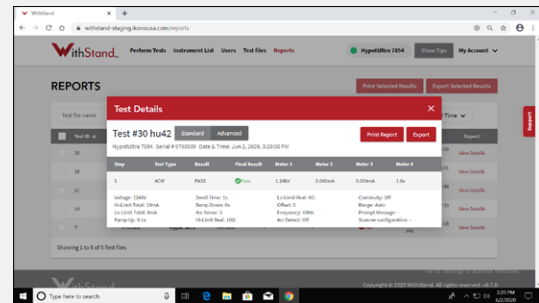

Compatible with 260 Series,
290 Series, and 440 Series

- Unlimited Users
- Remote Instrument Connection
- Intuitive User Interface
- Immediate Cloud Storage

The platform's interface introduces an intuitive user experience making it easy to setup, run tests and view your reports.

Cloud storage ensures that your tests and data will never be lost or altered – all information is stored immediately to the cloud for access at any time.

APPLICATIONS CONSULTING

- Implement best practices
- Validate your test system
- Conform to OSHA requirements

Master Workstation Safety with One-On-One Support

Applications Consulting provides customized training tailored to your specific company needs. We provide Online and On-site training packages as well as post-training support.

OUR CONSULTING PACKAGES

Digital Packages

A web-based learning program. Choose from 2 packages; our Consulting on Demand or Customized Digital Package.

On-site Training Package

1-4 day on-site, hands-on training for your production line or R&D lab.

On-site Validation Package

2 or 4 day on-site training to completely satisfy your organization's validation needs.

SAFETY | EDUCATION | PRODUCTIVITY
